

CHANDRANNA G R

Computer Science and Data Science Student

Ballari Institute of Technology and Management (BITM), Ballari, Karnataka

chandrannagr21@gmail.com · +91 9663147559 · Karnataka, India

[LinkedIn](#) · [GitHub](#)

Profile

Motivated Computer Science and Data Science engineering student at Ballari Institute of Technology and Management with an interest in software development, data science, artificial intelligence, and emerging technologies. Currently developing programming skills in C, Java, and Python while building practical projects using modern development tools. Interested in solving real-world problems through technology and continuous learning.

Education

Bachelor of Engineering – Computer Science and Data Science

2026 – Present

Ballari Institute of Technology and Management (BITM), Ballari, Karnataka

CGPA: 9.30

Pre-University Education

Government Pre-University College, Molakalmuru, Karnataka

School Education

Adarsha Vidyalaya, Molakalmuru, Karnataka

Technical Skills

Programming Languages: C, Java, Python

Data Science: Data Analysis, Data Visualization, Basic Machine Learning

Web Technologies: HTML, CSS, JavaScript, Streamlit

Tools and Platforms: Git, GitHub, VS Code, Replit, Overleaf, macOS Terminal

Database: Basic SQL

Other Skills: Generative AI Tools, Debugging, Version Control, Problem Solving

Projects

Fake News Detection System

Developed a Python-based application for identifying potentially misleading or fake news using machine learning concepts. Created an interactive interface using Streamlit.

Road Accident Analysis Dashboard

Developed a data analysis and visualization dashboard for analyzing road accident data and presenting meaningful insights through interactive visualizations.

Java Programming Collection

Created a collection of Java programs covering fundamental programming concepts including input handling, conditional statements, loops, arrays, methods, and object-oriented programming.

AI Tools Exploration

Explored generative AI tools for programming, productivity, learning, content creation, and creative applications. Experimented with AI-powered platforms to improve workflow efficiency, problem-solving, and project development.

Core Competencies

Problem Solving – Logical thinking and developing programming-based solutions.

Programming – Building practical applications using C, Java, and Python.

Data Analysis – Working with data, visualization, and analytical dashboards.

Continuous Learning – Exploring new technologies, development tools, and AI applications.

Teamwork – Experience working in collaborative academic and sports environments.

Discipline – Strong discipline and consistency developed through academics and athletics.

Areas of Interest

Software Development · Data Science · Artificial Intelligence · Machine Learning · Generative AI · Data Analysis

Languages

Kannada · English
